Press Release

MEDICA 2019 with a focus on automated instrument reprocessing

Malsfeld – Dr. Schumacher GmbH is pleased to again represent itself as an exhibitor at the MEDICA trade fair in Düsseldorf, which will take place from November 18 to 21, 2019.

As a leading developer and manufacturer of innovative disinfection and hygiene products for the medical field, Dr. Schumacher GmbH offers its well-established own brand, but also manufactures private label/OEM products for well-known companies. With more than 5,200 exhibitors from 71 nations in 17 exhibition halls, MEDICA is the largest event for the medical sector worldwide.

This year, Dr. Schumacher GmbH is focusing on innovative solutions for automated instrument reprocessing: The THERMOSHIELD family comprises products for a strong, yet gentle cleaning and disinfection of invasive medical devices and has especially been developed to meet the high demands of modern central sterilizations. The highlight of the product family is THERMOSHIELD XTREME, an enzymatic, mildly alkaline cleaner for automated reprocessing of medical instruments in washer-disinfectors. The instrument cleaner is particularly gentle on materials and is therefore also suitable for reprocessing sensitive medical devices. If required, the product can be supplemented with the neutralizing agents THERMOSHIELD C and THERMOSHIELD P for automated reprocessing.

In addition to a focus on automated instrument reprocessing, Dr. Schumacher GmbH will present products from the areas of surface, hand and skin disinfection as well as cleansing and care. As a complete supplier of products and services, the Dr. Schumacher GmbH team is looking forward to discussions with interested visitors in Hall 12, booth A47.

Dr. Schumacher GmbH

For over 40 years, Dr. Schumacher GmbH has been one of the leading developers and manufacturers of innovative products for disinfection, hygiene, cleaning, care and cosmetics - in the medical, non-medical and consumer sectors. The family-owned company based in Malsfeld, North Hesse, produces both under its own brand and on behalf of well-known brand manufacturers, retail chains and industrial companies as a private label/OEM manufacturer. Its customers include large drugstore chains, discounters and retail chains in Germany, as well as well-known international brand manufacturers. More than 1,850 employees at nine locations work to ensure that all customers are reliably supplied with goods. As one of the largest manufacturers of dry and wet wipes in Europe, Dr. Schumacher GmbH has its own production of disinfection wipe systems and wet wipes. A network of distribution partners in around 70 countries underlines the international orientation of the hygiene expert.
